

Zetaris Industry Solutions

Built using Zetaris & Dataiku

Zetaris Industry Solutions

The analytical solutions you need delivered in record time

Zetaris offers organizations real-time frictionless access to disconnected data through a one-stop shop for data integration and preparation across all data assets.

This enables users to minimize time spent accessing and preparing data, and maximize time delivering value through insight.

Now imagine a world-class analytical solution built using Dataiku that is fully integrated to Zetaris. With minimum engineering you can solve your biggest business problems.

With a pre-built Zetaris Industry Solution you can:

60%

reduction in
engineering
labor costs

6x

increased
delivery speed
projects

100%

data governance
and access
control

Getting data ready for analytics is both slow and expensive

Data is in a multitude of formats

Data has variable quality

Data lives in different environments

Projects take 6-9 months to implement

Zetaris Industry Solutions let you focus on outcomes, not engineering

- ✓ Pre-built industry specific solutions
- ✓ Ability to virtually create data pipelines in real-time
- ✓ Out-of-the box data quality management at source
- ✓ Industry specific unified semantic models

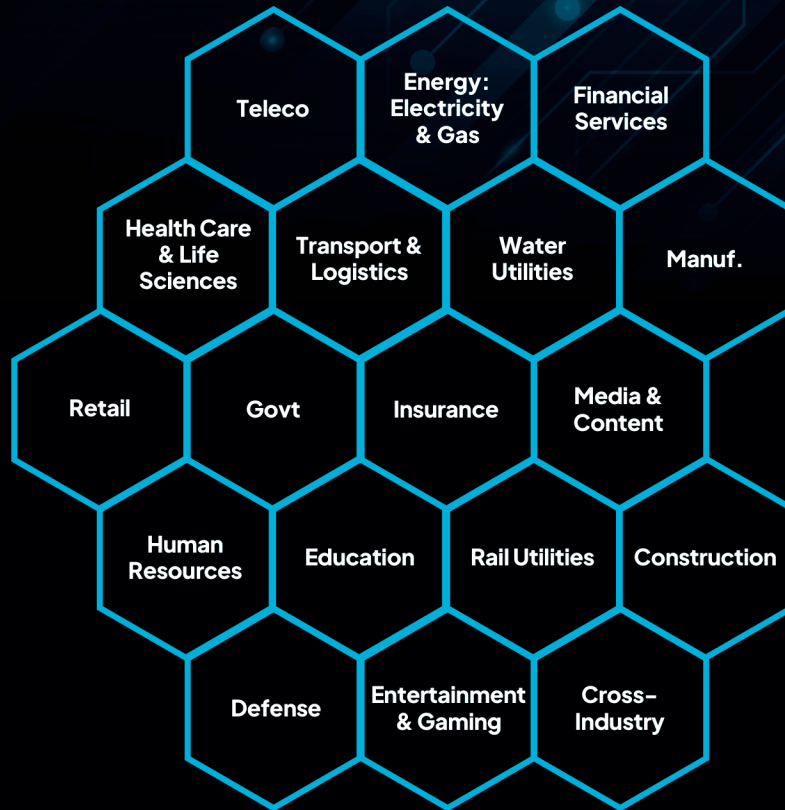

Combining the power of Zetaris with Dataiku – the world's best data science platform

+

Zetaris delivers complex analytical solutions across a range of industries:
